Public Health Information System

Public Health Centers:

**Service Planning Area 1 & 2
Deborah Davenport, RN, PHN, MS
Area Health Officer**

Antelope Valley Health Center
335B East Avenue K-16
Lancaster, CA 93536
(805) 723-4511

Keith Campeau, MD, Area Medical Director
Joanne Hobbs, RN, Nurse Manager

North Hollywood Health Center
5300 Tujunga Avenue
North Hollywood, CA 91601
(818) 766-3982

Nandini Sodhi, MD, MPH, Area Medical Director
Joanne Hobbs, RN, Nurse Manager

**Service Planning Area 3 & 4
Ricardo Calderon, MPH
Area Health Officer**

Central Health Center
241 N. Figueroa Street, Los Angeles, CA 90012
(213) 240-8225

Alan Kurz, MD, Area Medical Director
Cristin Mondy, RN, Nurse Manager

Hollywood-Wilshire Health Center
5205 Melrose Avenue, Los Angeles, CA 90038
(323) 769-7932

Alan Kurz, MD, Area Medical Director
Angela Lozano, RN, Nurse Manager

Monrovia Health Center
330 W. Maple Avenue, Monrovia, CA 91016
(626) 256-1600

Mitch Kushner, MD, MPH, Area Medical Director
Leticia Kouchak-Eftekhari, RN, Nurse Manager

Pomona Health Center
750 S. Park Avenue, Pomona, CA 91766
(909) 868-0235

Mitch Kushner, MD, MPH, Area Medical Director
Rachel Lee, RN, Nurse Manager

**Service Planning Area 5 & 6
Martina Travis, RN, Area Health Officer**

Simms Mann Health & Wellness Center
2509 Pico Blvd
Santa Monica, CA 90405
(310) 998-3203

Sheree Poitier, MD, Area Medical Director (acting)
Dee Warren, RN, Nurse Manager (acting)

South Health Center
1522 E. 102nd Street, Los Angeles, CA 90002
(323) 563-4112

Maxine Liggins, MD, Area Medical Director
Dee Warren, RN, Nurse Manager (acting)

Ruth Temple Health Center
3834 S. Western Avenue, Los Angeles CA 90062
(323) 730-3576

Maxine Liggins, MD, Area Medical Director
Dee Warren, RN, Nurse Manager (acting)

**Service Planning Area 7 & 8
Silvia Prieto, MD, MPH, Area Health Officer**

Torrance Health Center
711 Del Amo Blvd, Torrance, CA 90501
(310) 222-6571

Marsha Epstein, MD, MPH, Area Medical Director
Barbara Smith, RN, Nurse Manager

Curtis Tucker Health Center
123 W. Manchester Blvd, Inglewood, CA 90301
(310) 419-5362
Marsha Epstein, MD, MPH, Area Medical Director
Barbara Smith, RN, Nurse Manager

Whittier Health Center
7643 S. Painter Avenue, Whittier CA 90602
(562) 464-5350
Meri Rathbun, MD, MPH, Area Medical Director
Norina Cadena, RN, Nurse Manager

If you would like to receive surveillance reports and other information from the STD Program, please call (213) 744-3070 or register for STDInfo online at <http://ladhs.org/listserv> to receive surveillance reports and other information from the STD Program via e-mail.

** There was one case with unknown gender positive for HSV1 and HSV2

Sexually Transmitted Disease Clinic Morbidity Report, 2007

XVII: Appendices

APPENDIX A: LABORATORY DIAGNOSTIC TESTS USED FOR THE DIAGNOSIS OF SEXUALLY TRANSMITTED DISEASES IN LAC STD CLINICS IN 2007

All specimens sent from the Los Angeles County STD Clinics for gonorrhea, chlamydia, syphilis and HIV are tested at the Department of Public Health, Public Health Laboratory.

Testing for *Neisseria gonorrhoeae* and *Chlamydia trachomatis*

Chlamydia trachomatis is detected from urine, endocervical, and from August 2007, from rectal swabs using a nucleic acid amplification test (NAAT) Aptima Combo 2 Assay (Gen-Probe, Inc., San Diego, CA). *Neisseria gonorrhoeae* is detected from urine and endocervical, pharyngeal, and rectal swabs also using the NAAT Aptima Combo 2 Assay (Gen-Probe, Inc., San Diego, CA).

Testing for syphilis

Blood is screened for syphilis using the Rapid Plasma Reagin (RPR) test which detects antibodies to *Treponema pallidum*, the causative agent of syphilis. Antibodies against *Treponema pallidum*, become detectable one to four weeks after the formation of the chancre. All positive RPR tests are followed by a confirmatory, or treponemal, test that is specific for antibodies to *T. pallidum*.

Testing for HIV

Blood is screened for antibody to HIV-1 using an enzyme-linked immunosorbent assay (ELISA), Vironostika HIV-1 Microelisa System (Organon Teknika). Positive sera are confirmed using an alternative methodology, i.e. Western Blot (Genetic Systems Bio-Rad Laboratories).

Testing for Herpes

Lesions/specimens are tested for Herpes Simplex Virus using a real time polymerase chain reaction (PCR) (Real Art HSV ½ Light Cycler, Roche Diagnostics) that has been validated by the Public Health Laboratory for performance.

APPENDIX B: DATA MANAGEMENT

Data Management Methods

The Public Health Information System (PHIS) was used to examine all visits classified as “STD Clinical Visits.” The information collected from PHIS included demographic information such as gender, age, race/ethnicity, and marital status. In addition, PHIS information was used to determine the clinic visited as well as specific visit information such as the date of visit, tests conducted, and visit classification (i.e., “New” or “Return” visit). In addition, data from Quadramed was used for Antelope Valley Health Center because it does not use PHIS.

MISYS, the Public Health Laboratory database system was used to obtain laboratory results for chlamydia, gonorrhea, syphilis, and HIV. The laboratory results were merged with the PHIS/Quadramed data using the medical record number and the date of clinic visit/specimen collection. In addition, a definitive syphilis diagnosis for those with a positive confirmatory syphilis test, as well as treatment information for chlamydia, gonorrhea, and syphilis, was obtained using STD*CASEWATCH. The final dataset contains one record for each patient, per visit to the STD clinic.

Data Limitations

Possibility of multiple visits: If a patient sought care for the same event at multiple clinics, each visit was captured as a separate visit.

Definition of new visits: In order to account for multiple return visits for the same event, a separate analysis was conducted examining only visits classified as “New Visits.” The Department of Health Services’ “Procedures for Completing the Clinic Data/Patient Encounter Form” (Policy No. 301) specifies that:

- A “New Visit” is one in which a person is seeking service for the first time, or for a new episode, in an established clinic in the facility. Examples include a first time visit to a STD clinic; or a visit for a new episode, if the patient was previously treated adequately.
- A “Return Visit” is one in which a patient has a follow-up visit to a clinic or ancillary service in the facility for further evaluation, treatment, or results.

However in 2007, this definition may not have been uniformly applied at all public health centers and in some centers any visit occurring 30 days after an initial visit was considered a “Return Visit.”
